

# DEM-JET-3350UV

## Short Introduction

UV printing is a digital system which consist of uv flatbed printer, uv inks and RIP software to print directly on the product surface. It uses ultra-violet lights which will cure inks immediately once items are printed, so it can print on almost any kind of materials from plastics and glass to wood and metal with a better printing result and finer detail. Additionally, the uv inks are produced environmentally friendly with no smell and the process of uv curing helps increase the resistance to fading.

DEM-JET has knowledgeable experience (over 16 years) and advanced technology (with patents) in digital printing area, and owns three factories which are located in Kunming, Shanghai and Shenzhen crossing the map of China.

What We Can Offer:

- Experienced team to help you finalize your order
- Good quality in both machine and printing results
- 24\*7 after sale services
- Customization service is available as we have own R&D department
- Unlimited business opportunities

Company Address: 4F,Building E,Digital Silicon Valley,NO.89 Hengping Rd,Henggang St,Longgang

District,Shenzhen,China 中国深圳市龙岗区横岗街道横坪路 89 号数字硅谷 E 栋 4 楼

## Product Specification

Model	DEM-JET-3350UV
Printing technology	Piezoelectric inkjet
Print head	Epson XP2000 (Double print head adopted)
Max printing size	330*500 mm
Max printing thickness	200mm
Max printer resolution	5760*1440 DPI
Printer size	1120*820*800 mm
Ink type	UV inks
Colors	One print head for color ink : C/M/C/M/Y/K/ One for white ink: WWWWWW
Ink curing unit	UV LED lamp
Distance accuracy	Error of less than 0.3 mm of distance traveled
Printing speed (in photo mode)	4 pass 16 m <sup>2</sup> / h 6 pass 10 m <sup>2</sup> / h 8 pass 7 m <sup>2</sup> / h
Voltage	AC 110/220 V (Adjustable)
Working environment	Temperature 10°-35°C ( 50°-95° ) ; Humidity 20% - 80%
Data transfer	USB 2.0 Speedy
Operation system	Windows (2000, XP, Vista, 7 etc...)

## Product Features

### Double Print Head

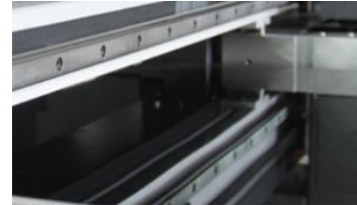

Print white, color inks in one pass to make your work easier and save your time, most importantly, it can perform extraordinary printed quality as there are 6 channels for white inks.

**Imported JFLO Chain**

Imported chain from brand JFLO which suitable for high speed movement and minimize the damaging hence to extend the lifetime and reduce the maintenance cost

**Top Quality Glass Table**

UV and high temperature resistance, strong and stable.

**Low Ink Warning System**

Ink volume sensor built inside. Light on when ink is in the low level, no troubles for ink using.

**Double UV Cooling System**

With wind and water circulation system built inside to cool down the uv temperature.

**Latest ink pump system**

Super stable ink mat and heads seal technology , all nozzles of head will be full of ink only by pump ONE second, save your ink

**Servo Motor**

controlled by computer chip, provide accurate displacement and speed control

**Self-developed Main Board**

Own patent owned which printer will not slow down after long-time working and also more functions.
