

# High Speed Single Pass Printer

---Model Z3

Note: Correct machine appearances depend on the actual model

## Looking for a print solution for thin materials?

The BYC168-Z3 offers professional quality printing on a integrated structure with flexible height adjustment to perfectly fit your needs.

The integrated design makes the performance of the machine more stable. When the product enters from the feeder and prints through the print head, the stable machine structure reduces the tiny shaking invisible to the naked eye, making the printing more accurate; at the same time, the stable performance reduces the difficulty of maintenance and makes users feel relieved

When you print larger size cardboards, shopping bags, wrapping papers or more - the versatile BYC168-Z3 iust ready to provide you with the high-speed, high-quality full-color printing you need!

- Wide range printhead for quality printing
- Fade, scratch, and water resistant ink (standard ink available)
- Height adjustment up to 10cm.
- **Optional auto feeder which can pass graduately even 28g cotton wrapping paper.**

## Product Parameters

Printer
